Subject index

Acidic media
Electrochemical behaviour of Pt(100) in various acidic media. Part II. On the relation between the voltammetric profiles induced by anion specific adsorption studied with a transfer technique preserving surface cleanliness and structure (Rodes et al.) 317
Aluminum films
In situ determination of the mechanical stress in anodic aluminum films (Teschke, Kleinke) 145
Anion specific adsorption
Electrochemical behaviour of Pt(100) in various acidic media. Part II. On the relation between the voltammetric profiles induced by anion specific adsorption studied with a transfer technique preserving surface cleanliness and structure (Rodes et al.) 317
Anodic stripping voltammetry
Resolution of highly overlapped differential pulse polarographic and anodic stripping voltammetric peaks by multicomponent analysis (Turnes et al.) 49
Anodic thin films
In situ determination of the mechanical stress in anodic aluminum films (Teschke, Kleinke) 145

Bioelectrodes
Immobilization of flavin coenzyme in poly(pyrrole-alkylammonium) and characterization of the resulting bioelectrode (Cosnier, Innocent) 339
Brightening
The chemistry of the additives in an acid copper electroplating bath. Part III. The mechanism of brightening by 4,5-dithiaoctane-1,8-disulphonic acid (Healy et al.) 179

Catalysis
Electric catalytic discharge of metal ions on mercury electrodes under catalysis by ligands (Tur'yan) 1
Electrogenerated 3,6-diaminoacridinium polymercurides and their role in the catalytic evolution of hydrogen (Studničková) 133
Charge-carrier generation
Nature of the processes of charge-carrier generation at ITIES by the photoexcitation of porphyrins (Kotov, Kuzmin) 99
Chloride ion
The chemistry of the additives in an acid copper electroplating bath. Part I. Polyethylene glycol and chloride ion (Healy et al.) 155
Coenzymes
Immobilization of flavin coenzyme in poly(pyrrole-alkylammonium) and characterization of the resulting bioelectrode (Cosnier, Innocent) 339
Conducting polymer
Poly(*para*-aminophenol): a new soluble, electroactive conducting polymer (Taj et al.) 347
Coordination
Electrochemical reduction and further coordination of substituted β-diketones with Cu(II), Co(II), Ni(II), Zn(II) in tetrahydrofuran (Kuncaka et al.) 213
1,2-Cyclohexanedione
Study of the electrochemical reduction of unhydrated 1,2-cyclohexanedione on mercury electrodes (Zón, Rodríguez Mellado) 229

Diaminoacridinium polymercurides
Electrogenerated 3,6-diaminoacridinium polymercurides and their role in the catalytic evolution of hydrogen (Studničková) 133

Differential pulse polarography
Resolution of highly overlapped differential pulse polarographic and anodic stripping voltammetric peaks by multicomponent analysis (Turnes et al.) 49
Digital simulations
Digital simulations with the fast implicit finite difference (FIFD) algorithm. Part II. An improved treatment of electrochemical mechanisms with second-order reactions (Rudolph) 85
Dithiaoctane-1,8-disulphonic acid
The chemistry of the additives in an acid copper electroplating bath. Part II. The instability of 4,5-dithiaoctane-1,8-disulphonic acid in the bath on open circuit (Healy et al.) 167
The chemistry of the additives in an acid copper electroplating bath. Part III. The mechanism of brightening by 4,5-dithiaoctane-1,8-disulphonic acid (Healy et al.) 179

Electroactive molecules
Matrix chain-length dependence of the electrochemistry of electroactive molecules in molten ionic conductive polymer electrolytes (Shi et al.) 353
Electrochemical parameters
On the theory of the quasi-reversible interfacial reaction. Part II. Method of determination of electrochemical parameters (Jin et al.) 73
Electrochemical polymerization
Electrochemical polymerization of several salen-type complexes. Kinetic studies in the microsecond time range (Audebert et al.) 269
Electrochemical quartz crystal microbalance
In situ probing of the adsorption of Pb^{2+} on oxidised platinum electrodes using an electrochemical quartz crystal microbalance (Wilde, Zhang) 359
Electrolytes
Liquid junction potential between different solvents. A junction with different electrolytes on the two sides (Izutsu et al.) 125
Electroplating
The chemistry of the additives in an acid copper electroplating bath. Polyethylene glycol and chloride ion (Healy et al.) 155
The chemistry of the additives in an acid copper electroplating bath. The instability of 4,5-dithiaoctane-1,8-disulphonic acid in the bath on open circuit (Healy et al.) 167
The chemistry of the additives in an acid copper electroplating bath. The mechanism of brightening by 4,5-dithiaoctane-1,8-disulphonic acid (Healy et al.) 179

Ferrocene
Matrix chain-length dependence of the electrochemistry of electroactive molecules in molten ionic conductive polymer electrolytes (Shi et al.) 353
FIFD algorithm
Digital simulations with the fast implicit finite difference (FIFD) algorithm. Part II. An improved treatment of electrochemical mechanisms with second-order reactions (Rudolph) 85
Flavins
Immobilization of flavin coenzyme in poly(pyrrole-alkylammonium) and characterization of the resulting bioelectrode (Cosnier, Innocent) 339

Helium
On an electrode producing massive quantities of tritium and helium (Chien et al.) 189
Hydrazine
Behavior of hydrazine and its effects on the adsorption of hydrogen at Pt(322) and Pt(111) electrodes in sulfuric acid solutions (Nishihara et al.) 299
Hydrogen
Electrogenerated 3,6-diaminoacridinium polymercurides and their role in the catalytic evolution of hydrogen (Studničková) 133
Hydrogen adsorption
Behavior of hydrazine and its effects on the adsorption of hydrogen at Pt(322) and Pt(111) electrodes in sulfuric acid solutions (Nishihara et al.) 299

Interfacial reaction
On the theory of the quasi-reversible interfacial reaction. Integer and half-integer integral and differential linear potential sweep voltammetry (Song et al.) 61
On the theory of the quasi-reversible interfacial reaction. Method of determination of electrochemical parameters (Jin et al.) 73
ITIES
Nature of the processes of charge-carrier

generation at ITIES by the photoexcitation of porphyrins (Kotov, Kuzmin) 99

Kinetic parameters
Use of a.c. second harmonic phase angle voltammograms to measure heterogeneous kinetic parameters (Senaratne, Hanck) 31

Lead adsorption
In situ probing of the adsorption of Pb^{2+} on oxidised platinum electrodes using an electrochemical quartz crystal microbalance (Wilde, Zhang) 359
Liquid junction potential
Liquid junction potential between different solvents. A junction with different electrolytes on the two sides (Izutsu et al.) 125

Mechanical stress
In situ determination of the mechanical stress in anodic aluminum films (Teschke, Kleinke) 145
Mercury electrodes
Electric catalytic discharge of metal ions on mercury electrodes under catalysis by ligands (Tur'yan) 1
Study of the electrochemical reduction of unhydrated 1,2-cyclohexanedione on mercury electrodes (Zón, Rodríguez Mellado) 229
Metal ions
Electric catalytic discharge of metal ions on mercury electrodes under catalysis by ligands (Tur'yan) 1
Mobile species
Quartz crystal microbalance and probe beam deflection studies of poly(1-hydroxyphenazine) modified electrodes (Miras et al.) 279
Multicomponent analysis
Resolution of highly overlapped differential pulse polarographic and anodic stripping voltammetric peaks by multicomponent analysis (Turnes et al.) 49

Phase angle voltammograms
Use of a.c. second harmonic phase angle voltammograms to measure heterogeneous kinetic parameters (Senaratne, Hanck) 31
Platinum electrodes
Behavior of hydrazine and its effects on the adsorption of hydrogen at Pt(322) and Pt(111) electrodes in sulfuric acid solutions (Nishihara et al.) 299
In situ probing of the adsorption of Pb^{2+} on oxidised platinum electrodes using an electrochemical quartz crystal microbalance (Wilde, Zhang) 359
UPD of zinc on polycrystalline platinum in various pH solutions (Aramata et al.) 367
Platinum surface
Electrochemical behaviour of Pt(100) in various acidic media. On the relation between the voltammetric profiles induced by anion specific adsorption studied with a transfer technique preserving surface cleanliness and structure (Rodes et al.) 317
Polyethylene glycol
The chemistry of the additives in an acid copper electroplating bath. Polyethylene glycol and chloride ion (Healy et al.) 155
Poly(1-hydroxyphenazine)
Quartz crystal microbalance and probe beam deflection studies of poly(1-hydroxyphenazine) modified electrodes (Miras et al.) 279
Polymer chain length
Matrix chain-length dependence of the electrochemistry of electroactive molecules in molten ionic conductive polymer electrolytes (Shi et al.) 353
Polymer electrolytes
Matrix chain-length dependence of the electrochemistry of electroactive molecules in molten ionic conductive polymer electrolytes (Shi et al.) 353
Poly(*para*-aminophenol)
Poly(*para*-aminophenol): a new soluble, electroactive conducting polymer (Taj et al.) 347
Polypyrrole
Immobilization of flavin coenzyme in poly(pyrrole-alkylammonium) and characterization of the resulting bioelectrode (Cosnier, Innocent) 339
Porphyrins
Nature of the processes of charge-carrier generation at ITIES by the photoexcitation of porphyrins (Kotov, Kuzmin) 99
Potential sweep voltammetry
On the theory of the quasi-reversible interfacial reaction. Integer and half-integer integral and differential linear potential sweep voltammetry (Song et al.) 61
Probe beam deflection
Quartz crystal microbalance and probe beam

deflection studies of poly(1-hydroxyphenazine) modified electrodes (Miras et al.) 279

Quartz crystal microbalance
Quartz crystal microbalance and probe beam deflection studies of poly(1-hydroxyphenazine) modified electrodes (Miras et al.) 279

Reduction
Electrochemical reduction and further coordination of substituted β-diketones with Cu(II), Co(II), Ni(II), Zn(II) in tetrahydrofuran (Kuncaka et al.) 213
Study of the electrochemical reduction of unhydrated 1,2-cyclohexanedione on mercury electrodes (Zón, Rodríguez Mellado) 229

Salen-type complexes
Electrochemical polymerization of several salen-type complexes. Kinetic studies in the microsecond time range (Audebert et al.) 269

Second harmonics
Use of a.c. second harmonic phase angle voltammograms to measure heterogeneous kinetic parameters (Senaratne, Hanck) 31

Second-order reactions
Digital simulations with the fast implicit finite difference (FIFD) algorithm. An improved treatment of electrochemical mechanisms with second-order reactions (Rudolph) 85

Solvents
Liquid junction potential between different solvents. A junction with different electrolytes on the two sides (Izutsu et al.) 125

Substituted β-diketones
Electrochemical reduction and further coordination of substituted β-diketones with Cu(II), Co(II), Ni(II), Zn(II) in tetrahydrofuran (Kuncaka et al.) 213

Sulfuric acid
Behavior of hydrazine and its effects on the adsorption of hydrogen at Pt(322) and Pt(111) electrodes in sulfuric acid solutions (Nishihara et al.) 299

Tetrazole derivatives
Cathodic behaviour of 5-trichloromethyltetrazole and some tetrazole derivatives (Niyazymbetov et al.) 239

5-Trichloromethyltetrazole
Cathodic behaviour of 5-trichloromethyltetrazole and some tetrazole derivatives (Niyazymbetov et al.) 239

Tritium
On an electrode producing massive quantities of tritium and helium (Chien et al.) 189

Ultramicroelectrode
Electrochemical polymerization of several salen-type complexes. Kinetic studies in the microsecond time range (Audebert et al.) 269

Undepotential deposition
UPD of zinc on polycrystalline platinum in various pH solutions (Aramata et al.) 367

Zinc
UPD of zinc on polycrystalline platinum in various pH solutions (Aramata et al.) 367
